

The Year of Sorrow — Tribute to Khadija (RA)

Project: a short website and exhibit for a 3D model representing the death of Khadija bint Khuwaylid (RA), the Prophet's grief, and psychological reflection.

Structure

- [src/html/](#) — source HTML pages (index, story, psyche, model, sources, team)
- [src/css/](#) — stylesheets (base, layout, components)
- [src/js/](#) — small JavaScript utilities (nav, lazy video, QR audio)
- [assets/](#) — images, optional video, audio, data (sources.json)
- [public/](#) — simple redirect to src/html

Quick start

1. Make sure the folder structure exists (you created it before).
2. Place images under [assets/images/](#) and the narration mp3 under [assets/audio/](#).
3. Open [src/html/index.html](#) in a browser for development preview.

Notes

- The website uses a gold & black palette suitable for the project's aesthetic.
- YouTube embeds are lazy-loaded when clicking the preview cards (script in [video-embed.js](#)).
- Replace placeholder images and the logo with your final files.

Next steps

- Optionally generate the QR code that links to [assets/audio/narration-qr.mp3](#).
- If you want, ask me to generate printable QR PNGs and a short script for the narration audio.
